

# JAKE VANDERPLAS

Software Engineer

Open Source Developer

Google, Seattle WA

<http://www.vanderplas.com>

[jakevdp@gmail.com](mailto:jakevdp@gmail.com)

---

I build software tools for engineers, data scientists, and researchers.

- I am a software engineer at Google Research in Seattle, working on tools that support data-intensive research.
- I maintain a technical blog, [Pythonic Perambulations](#), to share tutorials and opinions related to statistics, open software, and scientific computing in Python.
- I invest a significant amount of time in creating and developing Python tools for use in data-intensive science, including packages like *Scikit-Learn*, *SciPy*, *AstroPy*, *Altair*, and many others.
- Outside my employment, I participate in the broader data science community, developing and presenting talks and tutorials on scientific computing topics at various conferences in the data science world.

## EDUCATION

---

- PhD** Department of Astronomy, University of Washington, Seattle, WA  
2006–2012 advised by Andrew Connolly and Bhuvnesh Jain (U. Penn)  
Thesis: [Karhunen-Loeve Analysis for Weak Gravitational Lensing](#)
- MS** Department of Astronomy, University of Washington, Seattle, WA  
2006–2007 advised by Craig Hogan and Andrew Becker
- BS** Calvin College, Grand Rapids, MI  
1999–2003 Major: Physics; Minors: Mathematics & Japanese  
4-year letterman & 1-year captain of the swimming & diving team

## EXPERIENCE

---

### Employment

---

- Google** Software Engineer, Colaboratory Team  
2018–present Google Research, Seattle
- Google** Visiting Researcher  
2018 Google Research, Seattle
- UW eScience** Director of Open Software  
2017–2018 University of Washington eScience Institute.
- UW eScience** Senior Data Science Fellow  
2014–2018 University of Washington eScience Institute.
- UW eScience** Director of Research, Physical Sciences  
2014–2017 University of Washington eScience Institute.
- UW Computer Science** NSF post-doctoral fellowship, CI-TraCS program.  
2013–2014 Department of Computer Science, University of Washington. Supervised by Magda Balazinska
- UW Astronomy** Postdoctoral Researcher, LSST Image Simulation group.  
2012–2013 Department of Astronomy, University of Washington. Supervised by Andrew Connolly
- UW Planetarium** WorldWide Telescope Planetarium Project Coordinator  
2010–2012 University of Washington Planetarium, Seattle WA & Microsoft Research, Redmond WA
- UW Planetarium** K-12 and Community Outreach Coordinator  
2008–2010 University of Washington Planetarium, Seattle WA
- Mount Hermon** Experiential Science Educator (4th–8th grade students)  
2004–2006 Mount Hermon Outdoor Science School, Santa Cruz CA
- Summit Adventure** Wilderness Instructor: Backpacking, Rock Climbing, and Mountaineering  
2004–2005 Summit Adventure, Bass Lake CA
- Japan ESL** Teacher and Tutor of English as a second language  
2003–2004 Sendai, Japan

## Volunteering

---

- Neighborhood Advocacy** 2013–2015 As co-chair of the North Delridge Neighborhood Council, I facilitated community gatherings, service work, and other advocacy in our mixed-income neighborhood in southwest Seattle.
- Safe Streets Advocacy** 2010–2014 As a founder of West Seattle Greenways and transportation chair of the Delridge Neighborhood Council, I led the effort to secure grants and city funding totaling over \$2 million for pedestrian and bicycle safety improvements in the neighborhood.
- Pacific Science Center** 2009–2013 As a Science Communication Fellow, I facilitated activities for museum visitors and gave occasional community talks on astronomy and astrophysics.
- Sierra Club** 2007–2012 As a program leader for the Sierra Club's *Inner City Outings* program, I led 3-4 hiking & camping trips each year with Seattle youth.
- UW Planetarium** 2006–2012 Through my graduate career, I participated in the University of Washington Planetarium's K-12 outreach program, facilitating planetarium shows several times each quarter for visitors aged 4 to adult.

## Formal Teaching

---

- CSE 583** Software Development for Data Scientists  
Fall 2017 *University of Washington*
- CSE 599/ChemE 599** Software Engineering for Data Scientists  
Winter & Fall 2016 *University of Washington*
- Astr 599 / Applied Math 500** Python for Scientific Computing  
Fall 2014 *University of Washington*
- Astr 599** Scientific computing for Astronomy  
Fall 2013 *University of Washington*

## Service

---

- SciPy Conference** 2018 Co-chair of the Data Science symposium at SciPy 2018.
- Journal of Open Source Software** 2016-present Editor, Astronomy and Machine Learning
- Journal of Statistical Software** 2014-2018 Associate Editor, primarily focusing on submissions involving Python-language software.
- Astro Hack Week** 2014-2017 Creator of the annual Astro Hack Week conference series; sole organizer in 2014; co-organizer in 2015-2018. Since 2014, this model has been adapted by colleagues in other fields (including NeuroHackWeek and GeoHackWeek)
- SciPy Conference** 2017 Co-chair of the Astronomy & Astrophysics symposium at SciPy 2017.
- Python in Astronomy** 2016 SOC member & LOC chair for this 60-person, week-long workshop focused on development of Python tools for astronomers.
- PyData Seattle** 2015 Member of the local organizing committee.
- Computing the Universe** 2015 SOC member for this week-long workshop at the University of California, Berkeley.
- SciPy Conference** 2014 Tutorial co-chair for 2014 SciPy conference.
- PyCon** 2013-2017 Member of the tutorial review committee for PyCon 2013-2017.
- PyData** 2012-2016 Member of the organizing committee for several PyData conferences.

## Mentoring

---

<b>Callin Switzer</b> 2017-2018	Postdoctoral Fellow, UW eScience Institute & Biology Department
<b>Kathryn Neugent</b> 2017-2018	Graduate Student, UW eScience Institute & Astronomy Department
<b>David Fleming</b> 2015-2018	Graduate Student, UW eScience Institute & Astronomy Department
<b>Grace Telford</b> 2015-2017	Graduate Student, UW eScience Institute & Astronomy Department
<b>Jes Ford</b> 2015-2016	Postdoctoral Fellow, UW eScience Institute & Astronomy Department
<b>Xiaofeng Meng</b> 2015-2017	Postdoctoral Fellow, UW eScience Institute & Earth and Space Sciences
<b>SungWon Kwak</b> 2012-2013	Undergraduate, University of Washington Astronomy <i>Superimposed High Redshift Spectra</i>
<b>Andy Barr &amp; Devon McMinn</b> 2008-2009	Undergraduates, University of Washington Pre-MAP program <i>Astronomical Data Processing with LLE</i>

## AWARDS & HONORS

---

<b>DIRAC Institute</b> 2017-2018	Named <i>DIRAC Fellow</i> at the UW Data Intensive Research in Astronomy and Cosmology (DIRAC) Institute
<b>International Astrostatistics Association</b> July 2016	Winner of the 2016 <i>Outstanding Publication in Astrostatistics</i> award for <i>Statistics, Data Mining, and Machine Learning in Astronomy</i> (With Z. Ivezić, A. Connolly, and A. Gray)
<b>Data Analysis Contest</b> November 2015	Winner of “Most Insightful” analysis in the 2015 Pronto Cycle Share Data Challenge
<b>Data Science</b> 2014-Present	Named <i>Senior Data Science Fellow</i> at the UW eScience Institute
<b>Data Visualization</b> July 2013	Runner-up in the 2013 <i>John Hunter Excellence in Plotting Competition</i>
<b>CIDU Best Paper</b> October 2012	Recipient of the Best Paper Award, 2012 Conference on Intelligent Data Understanding (CIDU).
<b>NSF Fellowship</b> 2012	Recipient of a 3-year NSF prize fellowship through the office of CyberInfrastructure CI-TraCS program. NSF Award #1226371.
<b>Calvin College</b> 1999-2003	4-year recipient of the Calvin College Presidential Scholarship; 4 years on MIAA Athletic Honor Roll; recipient of the Roger D. Griffioen Physics Scholarship.

## COMPUTING

---

I am an active developer, maintainer, and contributor to several well-known scientific computing packages in the Python community. See my github profile (<http://github.com/jakevdp>) for details.

### Skills

---

- Experienced open source developer, with a specialization in scientific computing, including visualization, data mining and machine learning.
- Expert in the Python Language and extensions such as Cython; very good knowledge of C, C++, and interfacing to legacy Fortran code.
- Experience with a variety of tools and languages, including bash, csh, L<sup>A</sup>T<sub>E</sub>X, HTML, Javascript, D3js, Git, various database query languages, web templating engines such as Jinja, etc.
- Author of *Pythonic Perambulations*, a popular Python blog covering scientific computing, visualization, statistics, academia, and related topics: <http://jakevdp.github.io>

## Software

---

**Scikit-Learn** 2010–Present I am a member of the core team of [scikit-learn](#), a popular package for performing machine learning in Python. I have contributed in many areas, but most notably routines for efficient 2-point (e.g. nearest neighbors) queries, and algorithms based on these such as  $k$ -neighbor classification, kernel density estimation, and manifold learning. I have also presented tutorials on the subject on many occasions, including at the PyCon, SciPy, and PyData conferences.

**SciPy** 2011–Present I am a maintainer of [SciPy](#), the definitive repository for many scientific computing tools available in Python. My contributions are primarily in the sparse matrix package, including code for efficient solutions of large sparse eigenvalue problems, and for efficient traversal and analysis of large sparse graphs.

**Altair** 2016–Present I am co-creator of the [Altair](#) project, a declarative statistical visualization library for Python built on the Vega-Lite visualization grammar.

**AstroPy** 2014–Present I have contributed several components of the suite of statistics tools for the [AstroPy](#) project, a Python package aimed at astronomers. In particular, I wrote the modules for [Bayesian Blocks](#) and the [Lomb-Scargle Periodogram](#).

**Others** I have created and contributed to many other Python projects, including Matplotlib, IPython, NumPy, Pandas, AstroML, SciDB-Py, Pelican, mpld3, and others. I have also open-sourced much of my research code and teaching materials. More information is available in my [GitHub profile](#).

## SELECTED TALKS

---

*\*\* = invited talk*

Many of the slide-decks referenced below are archived at <http://speakerdeck.com/jakevdp/>.

## Keynote Addresses

---

- \*\*October 2019** *Python's Journey to Data Science*  
PyCon India 2019, Chennai, India
- \*\*April 2019** *A Survey of the Pydata Stack*  
PyCon Colombia 2019, Bogota, Colombia
- \*\*July 2017** *PyData 101: Everything you need to know to get started with data science in Python*  
PyData Seattle 2017
- \*\*May 2017** *The Unexpected Effectiveness of Python in Science*  
PyCon 2017, Portland OR
- \*\*July 2015** *The State of the Stack*  
SciPy 2015, Austin TX

## Computing

---

- May 2019** *Talk: How to Think about Data Visualization*  
PyCon 2019, Cleveland, OH
- May 2018** *Tutorial: Exploratory Data Visualization with Altair*  
*Talk: Performance Python: Seven Strategies for Optimizing Numeric Code*  
PyCon 2018, Cleveland, OH
- \*\*April 2018** *Data Visualization in Colab*  
Google Mountain View
- \*\*February 2018** *An Introduction to PyData*  
IndexConf 2018, San Francisco CA
- \*\*February 2018** *Bespoke Visualizations with a Declarative Twist*  
Convoy Tech Talk Series, Seattle WA
- \*\*September 2017** *Introduction to Machine Learning with Scikit-Learn*  
Neuro Hack Week 2017
- July 2017** *Scientific Analysis at Scale: a Comparison of Five Systems*  
SciPy 2017, Austin TX

- \*\*May 2017 *Python's Visualization Landscape (Submitted Talk)*  
PyCon 2017, Portland OR
- \*\*April 2017 *The Python Visualization Landscape*  
Puget Sound Python Meetup, Seattle WA
- March 2017 *Software Engineering for Data Science*  
Week-long short-course through PNNL, taught with David Beck and Joe Hellerstein
- \*\*November 2016 *Declarative Visualization in Python*  
Puget Sound Python Meetup, Seattle WA
- \*\*October 2016 *Python and Machine Learning in Astronomy*  
TalkPython podcast #81
- \*\*July 2016 *The Python Data Science Stack*  
JSM 2016, Chicago IL
- May 2016 *Statistics for Hackers*  
PyCon 2016, Portland OR
- \*\*April 2016 *Driving Reproducibility at UW*  
NYU Reproducibility Symposium, Brooklyn NY
- \*\*March 2016 *Introduction to Scikit-Learn*  
PyData @ Strata, San Jose CA
- \*\*March 2016 *Data Analysis with Pandas*  
Fred Hutchinson Cancer Research Institute
- \*\*December 2015 *Statistics for Hackers*  
CSSS Seminar, University of Washington
- \*\*December 2015 *An Overview of the Python Scientific Stack*  
Python in Geosciences Seminar, University of Washington
- \*\*September 2015 *Statistics for Hackers*  
Multithreaded Data Meetup, San Francisco, CA
- July 2015 *Machine Learning with Scikit-Learn* (2 hour tutorial)  
*Data Science at University of Washington* (30 minute talk)  
PyData Seattle 2015, Redmond WA
- \*\*June 2015 *Astronomy, Python, and Data Science at UW*  
Seattle DAML (Data/Analytics/Machine Learning) meetup
- April 2015 *Losing Your Loops: Fast Numerical Computing with NumPy* (30 minute talk)  
*Introductory Machine Learning with Scikit-Learn* (3 hour tutorial)  
PyCon 2015, Montreal, QC
- \*\*December 2014 *Data Science with Python.* (Invited Instructor for 3-day course)  
Institute of Health & Society, University of Oslo, Norway
- \*\*October 2014 *Machine Learning with Python*  
Practice of Machine Learning Conference, Redmond WA
- \*\*October 2014 *Introduction to NumPy and Matplotlib*  
PyData Strata 2014, New York NY
- July 2014 *Frequentism and Bayesianism: What's the Big Deal?*  
SciPy 2014, Austin, TX
- \*\*July 2014 *Parallel Computing in Python*  
Invited guest lecture, CodeFellows course
- \*\*April 2014 *Python in the Browser Age: Data Exploration in the IPython Notebook*  
OpenVisConf 2014, Boston MA
- April 2014 *Exploring Machine Learning with Scikit-learn* (3-hour tutorial)  
*Diving deeper into Machine Learning with Scikit-learn* (3-hour tutorial)  
with Olivier Grisel  
PyCon 2014, Montreal, QC

- November 2013 *Financial Time-series Data in SciDB*  
with Bryan Lewis  
PyData NYC 2013
- November 2013 *Efficient Computing with NumPy* (1.5-hour tutorial)  
PyData NYC 2013
- November 2013 *Machine Learning with Scikit-Learn* (1.5-hour tutorial)  
PyData NYC 2013
- August 2013 *Big Analytics for Python Users Without the Hassles*  
with Bryan Lewis, & Travis Oliphant  
Webinar presented by Paradigm4
- \*\*July 2013 *Interactive Computing with IPython and ASCOT*  
Clawpack Workshop, University of Washington
- July 2013 *An Introduction to Scikit-Learn* (2-part, 8-hour tutorial)  
with Gael Varoquaux, & Olivier Grisel  
Scipy 2013, Ausin TX
- July 2013 *Introduction to Python* (3-hour tutorial)  
Software Carpentry Course, Seattle WA
- April 2013 *Interactive Applications with Matplotlib* (2-hour tutorial)  
PyData Silicon Valley, Santa Clara CA
- April 2013 *An Introduction to Scikit-Learn* (3-hour tutorial)  
PyCon 2013, Santa Clara CA
- \*\*October 2012 *Scientific Machine Learning with Scikit-learn* (1-hour tutorial)  
*Interactive Visualization with Matplotlib* (1-hour tutorial)  
PyData NYC, New York NY
- July 2012 *Machine Learning in Python* (4-hour tutorial)  
Scipy 2012, Austin TX
- \*\*March 2012 *Scikit-Learn Tutorial* (1-hour tutorial)  
PyData Workshop, Google Campus, Mountain View CA

## Astronomy

---

- \*\*August 2017 *Statistics, Data Mining, and Machine Learning (don't really work) in Astronomy*  
Plenary session at the 18th International Workshop on Advanced Computing and Analysis  
Techniques in Physics Research (ACAT 2017)
- \*\*August 2016 *Fundamentals of Frequentist & Bayesian Statistics*  
2016 AstroHackWeek, UC Berkeley
- \*\*August 2016 *Git and Github for Driving your Research*  
*Software Engineering for Astronomers*  
*Introduction to Bayesian Inference*  
LSSTC Data Science Fellowship Program Summer School, Northwestern University
- \*\*June 2016 *Exploring Galaxy Evolution through Manifold Learning*  
Modern Massive Datasets, UC Berkeley
- \*\*April 2016 *Astrostatistics: Opening the Black Box*  
Fred Hutchinson Cancer Research Center Data Science Seminar
- \*\*January 2016 *Bayesian Methods in Astronomy*  
half-day workshop, 227th AAS meeting
- \*\*December 2015 *Astrostatistics: Opening the Black Box*  
Webinar, Inter-institutional Laboratory for e-Astronomy
- \*\*November 2015 *Astrostatistics: Opening the Black Box*  
Colloquium, Herzberg Institute of Astrophysics, Victoria, BC
- \*\*November 2015 *Astrostatistics: Opening the Black Box*  
Colloquium, Mitchell Institute for Fundamental Physics and Astronomy, College Station, TX

- \*\*June 2015 *Periodograms for Multiband Timeseries* (Invited Talk)  
*Machine Learning Workshop* (Invited instructor)  
 Local Group Astrostatistics conference, Ann Arbor, MI
- \*\*January 2015 *Code Licensing for Astronomy.* (Invited Short Talk)  
 225th meeting of the American Astronomical Society, Seattle, WA
- \*\*October 2014 *ESAC Data Analysis and Statistics Workshop.* (Invited Instructor)  
 European Space Astronomy Center, Madrid, Spain
- January 2014 *AstroML: Python-powered Machine Learning for Astronomy*  
 Jake VanderPlas, Andrew Connolly, & Zeljko Ivezic  
 AAS # 223, 2014, Seattle, WA
- \*\*November 2013 *Information Theory and Survey Design*  
 LBL Cosmology Seminar, Berkeley CA
- October 2013 *LSST and the Time-domain Universe*  
 Calvin College Physics Seminar, Grand Rapids, MI
- \*\*October 2013 *Unlocking the Universe with Python and LSST*  
 RuPy conference, Budapest, Hungary
- \*\*August 2013 *Reproducible Astronomy in the LSST Era*  
 Data Science Seminar, Los Alamos National Labs
- July 2013 *Opening Up Astronomy with Python and AstroML*  
 Jake VanderPlas, Andrew Connolly, & Zeljko Ivezic  
 Scipy 2013, Austin TX
- \*\*May 2013 *Information Theory and Survey Design*  
 UC Davis Cosmology Seminar, Davis CA
- \*\*April 2013 *Observational Tracers of Modified Gravity: Dwarf Disk Galaxies*  
 Novel Probes of Gravity Workshop, University of Pennsylvania
- October 2012 *AstroML: Machine Learning for Astronomy*  
 Conference on Intelligent Data Understanding, Boulder CO
- July 2012 *AstroML: Machine Learning for Astronomy*  
 SciPy Conference, Austin TX
- December 2011 *Processing Shear Maps with Karhunen-Loeve Analysis* (poster)  
 Jake VanderPlas, Bhuvnesh Jain, & Andrew Connolly  
 Neuro-Imaging Processing Symposium (NIPS), Granada Spain
- \*\*October 2011 *Alternatives to 2-Point Statistics in Weak Lensing*  
 DES Collaboration meeting, Philadelphia PA
- \*\*June 2011 *Digital Planetariums for the Masses*  
 AstroVis, University of Washington
- May 2011 *KL Interpolation of Weak Lensing Shear*  
 INPA Cosmology Seminar, Lawrence Berkeley National Laboratory, CA
- May 2011 *KL Interpolation of Weak Lensing Shear*  
 UC Davis Cosmology Seminar, Davis CA
- May 2011 *KL Interpolation of Weak Lensing Shear*  
 KIPAC Cosmology Seminar, SLAC National Laboratory, CA
- January 2011 *Finding the Odd One Out in Spectroscopic Surveys* (poster)  
 A. Connolly, S. Daniel, L. Xiong, J. VanderPlas, & J. Schneider  
 217th AAS meeting, Seattle WA
- January 2011 *3D Reconstruction of the Density Field* (poster)  
 Jake VanderPlas & Andrew Connolly  
 217th AAS meeting, Seattle WA
- July 2010 *A New Approach to Tomographic Mapping*  
 Ten Years of Cosmic Shear, Edinburgh, UK

\*\*November 2007 *SALT-2 Light-curve Fitting for SDSS Supernovae*  
SDSS Collaboration Meeting, Fermi National Accelerator Laboratory

## Academia & Policy

---

\*\*December 2016 *Promoting Open Science in the University*  
Invited Panel, Open Science and Big Data session at IEEE 2016, Washington DC

\*\*October 2014 *Stemming the Data Science Brain Drain*  
Invited talk, TTI/Vanguard *Reprogramming Programming*, Washington DC

August 2014 *Hacking Academia from Inside and Out*  
Breakout session, O'Reilly SciFOO, Mountain View CA

## General Interest

---

\*\*June 2013 *The Science of Time Travel*  
at the event *Short Films, Big Ideas: The Science of Science Fiction*  
Seattle International Film Festival, Seattle WA

\*\*March 2012 *Dark Matter, Dark Energy, and the Fate of the Universe*  
Calvin College Physics Colloquium, Grand Rapids MI

\*\*November 2011 *Kinect/WorldWide Telescope Demonstration*  
Supercomputing 2011, Seattle WA

\*\*November 2011 *WorldWide Telescope Demonstration*  
Partners in Learning Global Forum, Washington DC

\*\*November 2011 *Gravity: A Lens to the Universe*  
KCTS9 Queen Anne Science Cafe, Seattle WA

\*\*October 2011 *WorldWide Telescope Demonstration*  
Popular Mechanics Breakthrough Awards, New York NY

\*\*March 2011 *Understanding the Dark Side of the Universe*  
Pacific Science Center's "Science with a Twist", Seattle WA

\*\*February 2011 *Interconnection in Art and Cosmology*  
at the *Traces of the Universe* Art show,  
University of Washington, Seattle WA

May 2009 *Dark Matter, Gravitational Lensing, and Cosmology*  
Battle Point Astronomical Society, Bainbridge Island, WA
